

Introducing
rt360 – Climate Risk Monitoring

A comprehensive solution for navigating the climate risk landscape.

Compliance with Evolving Governance Standards and Effective Navigation of Climate Risks

Adopt an integrated approach to sustainable governance, compliance, and risk management
Utilize a holistic framework for board oversight, portfolio monitoring, and stress testing

Why choose rt360 – Climate Risk Monitoring?

rt360–Climate Risk Monitoring is a comprehensive platform OR solution? designed to assist banks and financial institutions in adopting a holistic and integrated approach towards governance, compliance, and risk management related to sustainable and resilient practices.

Governance & Risk Assessment: Streamline the allocation of roles and responsibilities across Business Units (BUs), empowering institutions to proactively address climate risk.

Portfolio Monitoring: Ensure financial portfolios remain resilient in the face of climate-related challenges.

Stress Testing & Scenario Analysis: Evaluate the impact of physical and transition risks on strategies and portfolios, fortifying resilience against uncertainties.

Reporting: Seamlessly incorporate climate risk into internal reporting processes.

Key features

Comprehensive Single Platform:

Streamlines processes, enhancing the efficiency of climate risk management practices

Integration with Enterprise Risk Management:

Ensures a cohesive approach to risk management, enhancing the institution's overall resilience

Global Standards Compliance:

Provides a framework for institutions to showcase their commitment to sustainable financial practices

Cloud-Native & Mobility-Enabled:

Access critical insights on climate risk on the go, enabling informed decisions
